Education

-B.Sc. in Systems Engineering (in progress)
EAFIT University, Medellín – January 2023 to Present

-Artificial Intelligence with Deep Learning Course
Sabana University – 1st Semester 2025

-High School Diploma
Colegio San Ignacio de Loyola
Graduated 2022

International experience

- **FHNW University Switzerland | Basel,** SwitzerlandAcademic & Cultural Immersion Program (EAFIT International Office) 2025
- **Academic Exchange Program | Auckland, New Zealand** Cultural & Linguistic Immersion | 4 Months

Language

-English

-Portuguese

About Me

I am a Motivated Systems Engineering student seeking to broaden knowledge across different areas of technology. Particularly interested in databases and data analysis. Enthusiastic about learning and applying new tools, with a growing focus on Artificial Intelligence and Machine Learning.

Skills

-Programming & Software Development Java, Python, C++, Haskell, JavaScript
-Web & Mobile Development React, Flutter, Django, HTML/CSS
-AI & Machine Learning PyTorch, YOLO, OpenCV, Pandas, Reinforcement Learning
-Data Analysis & Visualization Power BI, SQL, PostgreSQL, MongoDB
-Cloud & DevOps AWS, Docker, Linux, Git
-Automation & Integration N8N, Power Automate, MSYS2
-Project Management & Continuous Learning Agile Methodologies, Version Control, Problem Solving

Work Experience

2022 – 2023
Peering Latam
Logistics Assistant

Managed and organized accounts and data in Excel spreadsheets.
Translated presentations and documents into English and Portuguese to support international communication.
Facilitated effective communication with colleagues and clients from different countries.

2024
Plus Internet
Call Center & Internal Technician

Performed database migration tasks.
Provided technical assistance to operators and internal staff.
Software Developer

2025
Freelancer
Developer work

I made websites for small and medium companies
I worked with different languages such as Python, Java and Flutter
Some examples of my work:
